**X-Ray Protocol:**

The following 14 x-ray images are to be made with an imprinted nametag including registration number on the sedated horse without horseshoes:

- Toe front on both sides (90 °)
- Navicular images on both sides (with image of the navicular channel) - Toe on both sides (90 °)
- Hock joints on both sides (0 °, 45 ° and 115 °)
- Stifle joints on both sides (110 °)

See Images Following – images may vary slightly from above list.

**List of impairments of health for stallions**

<b>Hereditary defect</b>	<b>Inspection/examination</b>	<b>Maximal degree of formation</b>
Jaw anomaly	Specialized veterinary inspection	Incisors may not protrude more than 50 % from tooth surface.  Deviations of one or more tooth/teeth, i.e. askew/crooked teeth count as criterion for exclusion.
Cryptorchidism	Specialized veterinary inspection	Both testicles should be equal and normal sized in form, rigidity/strength and size and entirely descended in the scrotum.
Osteochondrosis	Specialized veterinary inspection	<ul style="list-style-type: none"> <li>- 1 osteochondral finding in the stifle joint</li> <li>- 1 osteochondral finding in the hock and 1 finding in another joint (no more than 3 total)</li> </ul>
Hemiplegia laryngeal	Stallions with inspiratory breathing sound:  Specialized veterinary inspection	Paralysis of larynx

It is herewith specialized veterinary confirmed that the stallion

Name: \_\_\_\_\_

Equine Life Number: \_\_\_\_\_

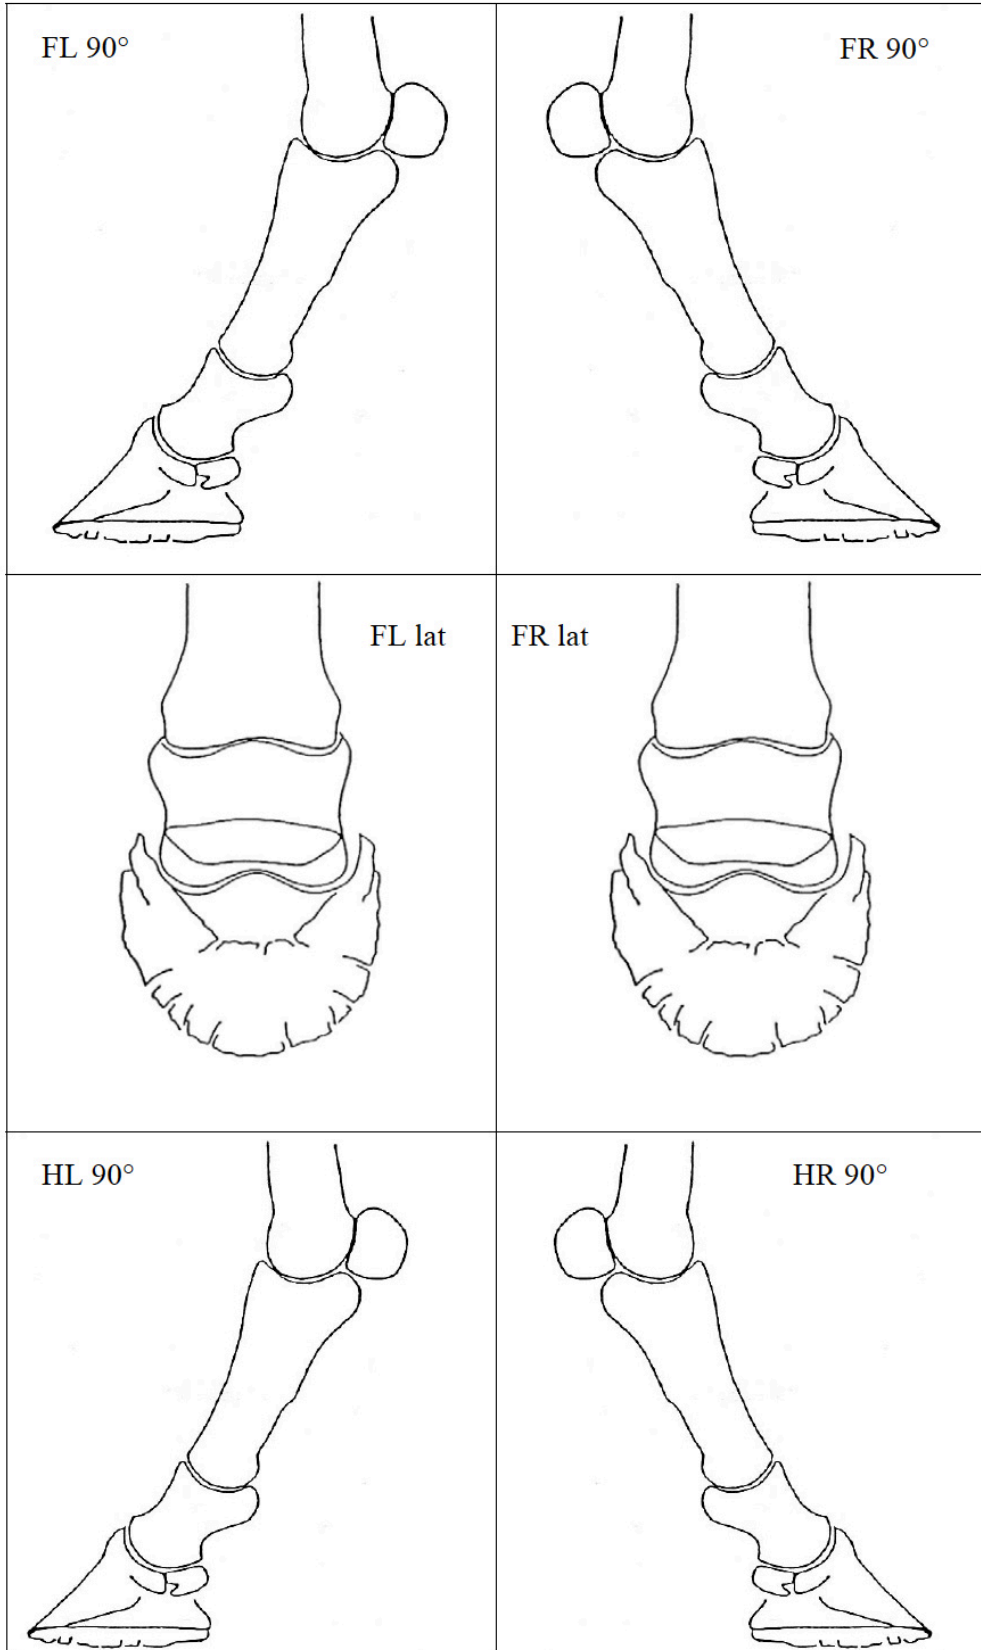

fulfills the principles of the Westfälisches Reitpferd pursuant to the list above.
